Livingston, CA 95334

March 23, 2020

To All City of Livingston Residents

I am sure that you have heard or seen Social Media Trends or on the News about Nurses and Doctors communicating the following:

“We came to work for you. So you can stay at home for us”.

The Coronavirus (COVID-19) is deadly and we need to stay at home. We need to follow the Governors **Order**, in addition to the Public Health Orders.

The Coronavirus has been so successful because they need bodies-----**SO PLEASE STAY HOME!!!**

For example, most respiratory viruses tend to infect either the upper or lower airways. In general, an upper-respiratory infection spreads more easily, but tends to be milder, while a lower-respiratory infection is harder to transmit, but is more severe.

Conceivably this might explain why the virus can spread between people before symptoms show up—a trait that has made it so difficult to control.

- The experts are saying that 20% to 25% of community spread is from individuals that are A-symptomatic, meaning that they don't show any signs of being sick.
- We don't want Doctors to be put in a position where they are going to be asking themselves: **Who will be saved? Who won't?**
- As coronavirus infections skyrocket our local hospitals will be forced to make harrowing choices.
- We don't have enough Personal Protective Equipment and testing is limited.
- This is an invisible enemy.

Italy is one of the best funded and more advanced health care countries in the world and they are overwhelmed. **Let's sacrifice some freedom so we can save our future!!!**
