According to our municipal code, the elected city clerk is to receive a monthly stipend of only \$100 per month.

However, the list of duties and working knowledge requirements, in the proposed Ordinance Amendment, far exceeds what one might expect of a \$100 per month position.

How many of the tasks involved in these requirements do you really expect of a person receiving only \$100 per month?

Which of these tasks are to be performed by the \$100 per month elected city clerk, and which are to be delegated to a knowledgeable and technically competent deputy city clerk?
